

■ WEBSITE WALKTHROUGH — SEPTEMBER 2026

Tell us the occasion. We'll cut it to the gram.

A simple walk through the NUDJ website — every step a customer takes, every feature on the way, and the dashboard that runs it all.

[Customer journey](#)

[All features](#)

[Admin dashboard](#)

A butcher that asks before it cuts.

Most people don't know how many kilos they need for ten guests, or which cut works for mandi.

NUDJ starts with that question. You tell us the occasion. We work out the rest — the meat, the cutting, the marinade, even the charcoal.

Three questions every host asks. Three answers built into the site.

01

“How much do I buy?”

The advisor works it out to the gram, from the number of guests and the dish.

THE ADVISOR

02

“How should it be cut?”

Pick any cutting style — cubes, slices, steaks, kabsa pieces, mince. Cutting is always free.

03

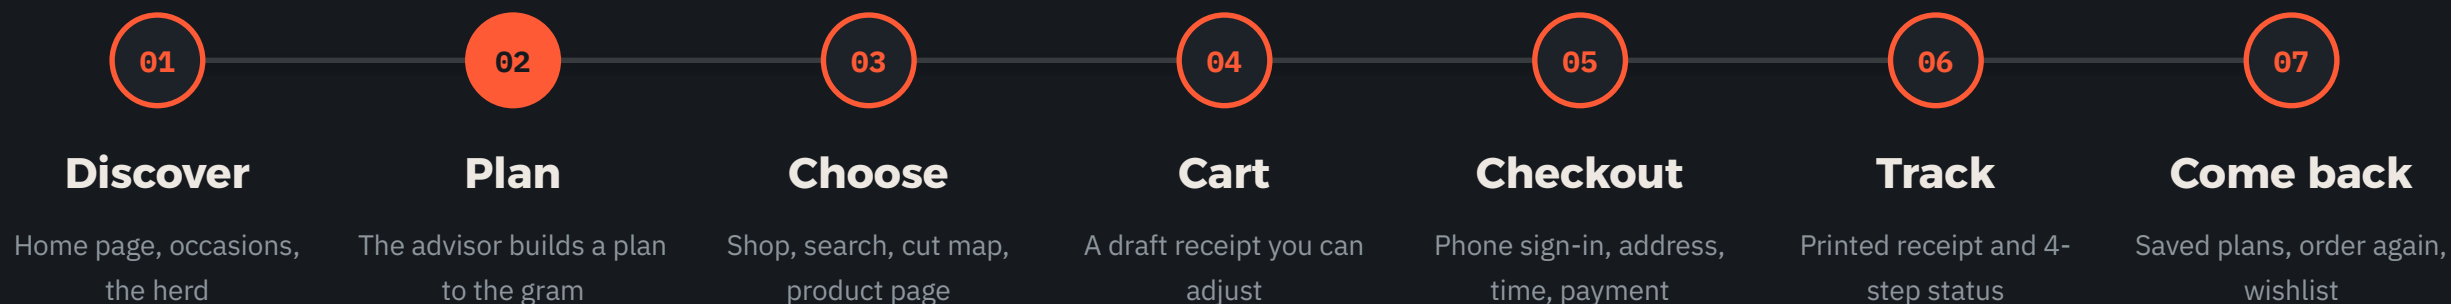

“What else do I need?”

Marinade, skewers, charcoal and spices are part of the plan, each with a clear price.

MEAT + KIT IN ONE PLAN

One journey. Seven simple steps.

■ **Behind every step:** the admin dashboard — orders, stock, analytics, reports and every word and price on the site.

Meet Khalid.

Guests on Thursday.

Khalid is 34 and lives in Riyadh. He is hosting a BBQ for ten friends. He knows what he wants to cook — he just doesn't know how much to buy.

- GOAL** Enough meat for ten, ready to grill, delivered before 6 pm.
- WORRIES** Buying too little, spending too much, forgetting the charcoal.
- USES** His phone, between meetings, in Arabic or English.

Five things before launch.

WORKS END TO END TODAY

- The full customer journey, desktop and phone
- The advisor, in Arabic and English
- Orders, tracking and account
- The dashboard: analytics, reports, editing, publishing
- Visit tracking (sessions, sources, funnel)

NEEDED BEFORE LAUNCH

- **Payment gateway** — payment is simulated
- **SMS provider** — for the sign-in code
- **Server + database** — orders live in the browser today
- **Secure admin login** — the PIN is a light lock
- **Automatic stock deduction** with every order

Good news: visit tracking already sends everything through one function — connecting a server is one change.

One site. Two sides.

FOR CUSTOMERS
